SCHOOL OF PUBLIC HEALTH
Department of Epidemiology

Harvard T.H. Chan School of Public Health
Department of Epidemiology

Assistant or Associate Professor of Epidemiology

The Department of Epidemiology at the Harvard T.H. Chan School of Public Health (HSPH) invites applications from candidates for a faculty position as assistant or associate professor of epidemiology, with a focus on Alzheimer's disease and other sources of age-related cognitive decline.

The successful candidate will contribute to expanding the department's role as a center for clinical epidemiologic research and training. Areas of interest include etiologic and prognostic research, integration of biomarkers and imaging into research studies, and comparative-effectiveness research. He or she will be expected to conduct original empirical research in Alzheimer's disease, other forms of dementia, and age-related cognitive decline and to facilitate departmental engagement in these areas with related efforts within the Harvard Chan School, Harvard Medical School, and Harvard teaching hospitals (e.g., the Nurses' Health Study and the Health Professionals Follow-up Study, the Center for Alzheimer Research and Treatment, and the Massachusetts Alzheimer's Disease Research Center). The successful candidate will also participate actively in teaching and in the direction of training programs in this area.

Candidates must have a medical degree and gradual level training in epidemiology (or substantial experience with the application or development of epidemiologic methods), or a doctorate in epidemiology or a related field with substantial experience in clinical epidemiology. A commitment to research and teaching in the field of Alzheimer's disease and related conditions is also required. Early career investigators are particularly encouraged to apply.

The Harvard T.H. Chan School of Public Health seeks to recruit, develop, promote, and retain the world's best scholars. We are committed to upholding the values of diversity, equity, and inclusion in our hiring and promotion processes. Women and individuals from underrepresented racial and ethnic minority groups are strongly encouraged to apply.
